

Funware

Colorful, Whimsical, Practical & Fun!

Wire Wrapped & Beaded Stainless Utensils & Giftware

Funware is attractive, whimsical, and practical - it is designed, crafted and intended for use! Funware stainless pieces are hand-decorated by United States artisans. No two items are identical as each signed piece is uniquely hand crafted. Don't be fooled into thinking Funware is too pretty to use! Customers urged me to find large pieces with holes for hanging Funware on a wall or rack when not in use, rather than tucking it away in a drawer. This is art you can enjoy using and looking at! Properly cared for, Funware should provide years of enjoyment while adding that special "zing" to your table and your entertaining.

FUNWARE

Minis

Funware Mini-Spreaders, Mini-Spoons & Mini-Forks make wonderful gifts. You can wrap a Mini-Spreader in tissue & mail it in a card as a 'thank you' for a special favor. When invited to a friend's home for dinner, skip the usual bottle of wine. Instead bring over an appetizer and a **Funware** Mini. Much more creative & much more fun. (Of course, leave the **Funware** Mini for your host!) Use your **Funware** Minis for serving olives, pickle chips, spreads, jam, butter, sugar, pâté, salsa... A 4-piece Mini-Set makes a terrific housewarming gift!

Mini-Spoons & Mini-Forks make great sets for the little ones. They will enjoy their meals even more when using colorful **Funware** Minis. So will you.

I am sure you can come up with other great ideas for **Funware** Minis!

Detail of Mini

What is 18/8 Stainless?

Stainless steel is usually available in two qualities, 18/0 and 18/8. The '18' refers to 18% chromium which is added to the steel mix to give it stainless properties. The '8' refers to 8% nickel, which gives it a silvery sheen. 18/0 is less expensive than 18/8. 18/8 gives greater protection against corrosion and has a softer shine; it is one of the the top grades of stainless steel. 18/0 and 18/8 are both fully dishwasher-safe. All **Funware** minis and large **Funware** serving utensils are 18/8 stainless. **Funware** will not rust or corrode regardless of the grade of stainless.

About the Artist

With a Masters Degree in Art and a specialty in Microcomputers in Education, much of Cyndi's life has been spent as a teacher and trainer from preschool through university. After many years almost exclusively using the left side of her brain in the technology field, she has returned to art, one of her first true loves. These days she tries to use both sides of her brain (not always concurrently) with her home-based design and printing company, *Its My Business!*, and making hand-decorated **Funware** stainless table art and other hand-made items. She hopes you will get as much pleasure and enjoyment from **Funware** as she has designing and creating it.

FUNWARE

Gift Sets

Choose from Ceramic Mugs, Plates, Dishes & Bowls with a coordinating Funware utensil. Gift items, flatware styles and types vary based on availability — utensils may or may not be 18/8 Stainless (see page 2 to learn more about 18/8 Stainless).

Use & Care

All Funware wire is tinned or bare copper, colored and then coated with 100% PVC plastic, capable of withstanding a temperature of 265° Fahrenheit for 30 minutes. Most customers put Funware in the dishwasher; I have run all mine through many cycles dozen times with no apparent damage. A few of the beads I use may

not be colorfast, and dishwashing could hasten fading or color change. Since dishwasher temperatures & cycles vary, I cannot be responsible for damage which may occur from dishwashing. Please use the dishwasher at your own risk. Preferred care is gentle hand washing after each use - if you have served something sticky, try not to let the food harden. If it does, overnight soaking, followed by a gentle cleaning with dishwashing soap and a sponge works fine. With proper care, Funware should give you years of enjoyment.

Place Settings

Five-piece place settings are custom designed to match your dinnerware and start at \$49.95 per place setting for two forks, two spoons and a knife. Minimum order is two place settings. A sample piece will be made for your consideration before your place settings are started. A deposit is required.

FUNWARE

Colors

Funware Mini - Spreaders (below) in some of the Funware colors; they are approximately 5 1/2" in length. Mini-forks and Mini-Spoons (pictured on page 2) are also available.
